

Do you suffer from mild to moderate sleep apnea? You don't have to get a CPAP!

If you're dreaming of getting a good night's sleep, it's time to see if you're a candidate for oral application therapy.

What is Oral Application Therapy?

an effective, non-invasive medical device for sleep apnea treatment that's prescribed and calibrated by specially trained dentists like Dr. Dalton.

Oral Application Therapy is a long-term solution that's as effective as a CPAP for mild to moderate obstructive sleep apnea sufferers.

See what solution is best for you!

Advantages of Sleep Appliance Therapy:

- Comfortable
- Convenient
- Compact and travel-sized
- No power needed

SLEEP APNEA

BY THE STATS

22

MILLION AMERICANS

suffer from sleep apnea

50

PERCENT

of people who use an oral appliance used it for more than 18 months

31

PERCENT

of patients never begin CPAP treatment after their diagnosis
